INTRODUCTION

The figures contained herein are based on data obtained from the 1933 Census, the Civilian Register of 1943, the Occupational Survey of 1945, Annual Censuses of Factory Production and Returns from Governmental Authorities, together with Monthly Pay-Roll Tax Returns lodged by all employers (other than Commonwealth Government Authorities, religious and benevolent institutions and public hospitals) paying more than £20 per week in wages.

The terms "Employment", "Number Employed", "Employees" and "Wage Earners" herein are synonymous with, and relate to, "wage and salary earners" on pay-rolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include persons employed part-time.

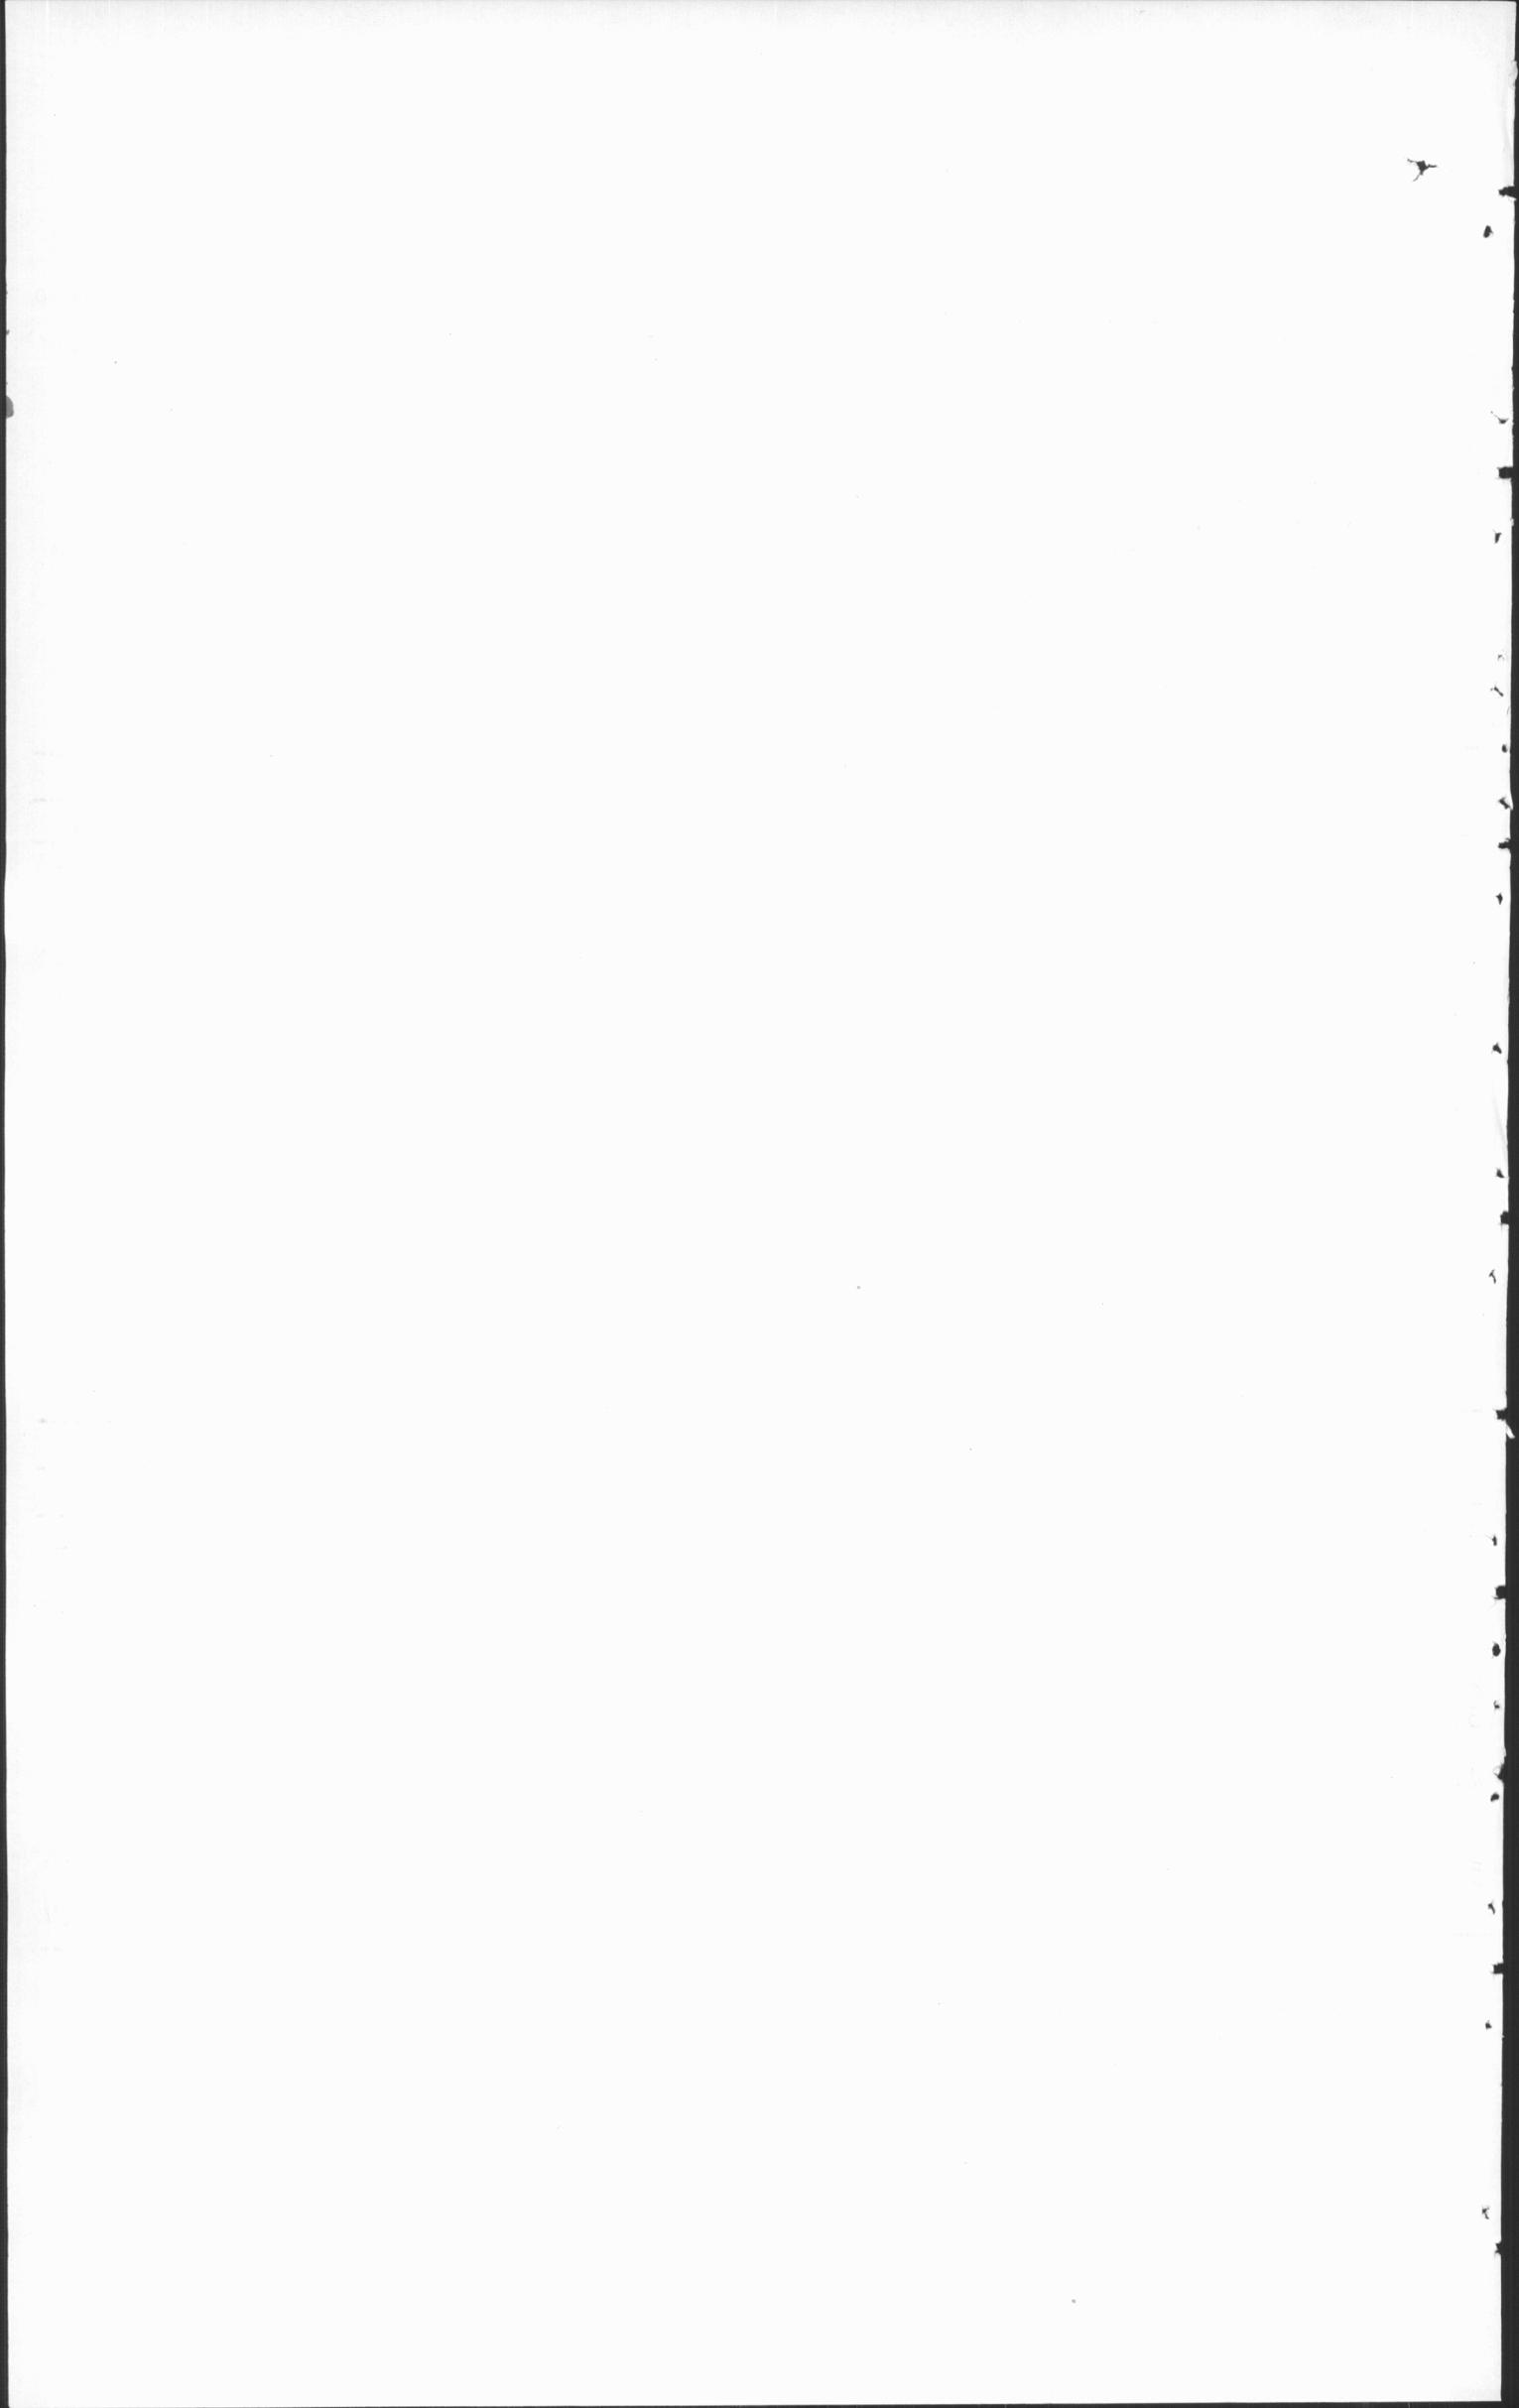

Figures for recent months are subject to revision. (See also note (a) on page 7).

PREFATORY NOTES

1. The figures published herein are estimates. Further investigation may show the need for some revision in the monthly aggregates. It is not anticipated, however, that any such revision will affect the trends shown by the figures in Tables 1, 2 and 3. Some revision will be necessary in the totals and trends in employment shown for individual industries (particularly manufacturing) in Tables 4 and 5. Tables showing employment by various classes of Factory have been discontinued for the present. Action is being taken to establish estimates of current monthly employment in factories by direct collection.

2. Owing to the time incidence of call-ups for short periods of National Service training since August, 1951, and in a lesser degree to enlistments in the permanent and/or oversea forces, some aspects of the changes in numbers of total Civilian Employees cannot be understood unless considered in conjunction with changes in numbers in defence forces or undergoing National Service training. Relevant figures are as follows:-

NOTES TO TABLES 4 AND 5

(a) All figures for the months subsequent to May, 1945, are subject to revision on the basis of results of the Census of 30th June, 1947 (except for Factories, for which figures to June, 1948 are final).

(b) Includes Northern Territory and Australian Capital Territory.

(c) Refers to estimated employment in factories as defined for the purpose of the annual production census, results of which are published annually in the Production Bulletin, Part I, "Secondary Industries". In this connection, a factory is defined as an industrial establishment in which four or more hands are employed, or in which power other than hand is used. The employees covered are those engaged in manufacturing activities and exclude those engaged in selling and distribution, etc.

(d) Includes employees in industrial establishments outside the scope of the definition of a factory (given in (c) above) and persons employed by factory proprietors but engaged in selling or distribution, etc., who are excluded from figures shown opposite "Factories".

(e) Includes Law and Order, Religion and Social Welfare, Health, Education, Other Professional Services, Entertainment, etc. and Personal Service, (Hotels, Restaurants, etc., excluding female private domestic). In respect of females only, also includes Forestry, Fishing, etc., Mining, Building and Construction.

(f) Figures for June, 1949 were affected by the Australia-wide black coal dispute which commenced on 27th June and ended 15th August, 1949, and figures for May have therefore been substituted for purposes of annual comparison.

(g) Includes employees of private employers contracting to public authorities.

(h) Includes employees on construction of roads, bridges, earthworks, etc. and employees directly employed by public authorities on building and maintenance of buildings.

(i) Includes Hotels, Restaurants, Hairdressing and Other Personal Services (except female private domestic).

(a) Including Salaries. (b) Average earnings per male unit employed. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. (c) Subject to revision.

Note:- The two series in the above table are not comparable horizontally. Further explanation to this table is shown on page 8.

The "All Industries" index is based on Pay-roll Tax returns and other data,

The index for manufacturing industries for the years 1944-45 to 1950-51 is based on average earnings of male wage and salary earners employed in factories as disclosed by annual factory returns. Figures subsequent to June, 1950 are preliminary estimates based on Pay-roll Tax Returns.

TABLE 7 : AVERAGE NOMINAL WEEKLY WAGE RATES : ADULT MALES
INDUSTRIAL GROUPS - STATES, 31ST JANUARY, 1952 (a)

Index-numbers (Base : Weighted Average for Australia for three years ended June, 1939 = 100)

The index-numbers in the following table are based on averages of wage rates for a full week's work obtained from awards, determinations and industrial agreements. The average rate of wage for each industrial group in each State is the arithmetical average of the rates of wage payable for all classified occupations within that group. The results for each State and for each industrial group throughout the States are weighted averages.
